PROJECTS

Moodies | Github: github.com/sylhuynh/moodies
Link: sylhuynh.github.io/moodies

An application using APIs to recommend local restaurants based on the user's current mood. My responsibilities were to create the algorithm that converted the user's mood to food. As well as the functionality to generate the card and reveal info upon a match.
Utilized HTML, CSS, Javascript, Jquery, Zomato API, OpenWeather API, Materialize Framework

Weather Dashboard | Github: amboffman.github.io/weather-dashboard
Link: amboffman.github.io/weather-dashboard

An application using OpenWeather API for the user to search a city's weather as well as five day forecast. This was a solo project where I built the entire application from scratch.
Utilized HTML, CSS, Javascript, Jquery, OpenWeather API, Bootstrap Framework

Password Generator | Github: github.com/amboffman/password-generator
Link: amboffman.github.io/password-generator

This application randomly generates a password based on the user's requested criteria. My role in this project was to build this program with javascript.
Utilized HTML, CSS, Javascript
